

Dummy Medical Report

Patient Name: Fatima Bibi

Age: 45

Gender: Female

Date of Report: May 19, 2025

Diagnosis:

The patient is suffering from a severe kidney infection that has led to renal failure.

She urgently requires dialysis treatment followed by a possible kidney transplant.

Recommended Treatment:

- Immediate dialysis (3 sessions per week)
- Lab tests and medication
- Evaluation for transplant eligibility

Estimated Cost: PKR 180,000

Due to low family income, financial support is being sought to begin and sustain treatment.

This document is issued to verify the medical condition for fundraising support.
